PROPOSAL

As culture and generation change, metrics to attract 'money' and increase capitals also invariably appear and vanish. Nowadays, the concept of capitalism has transformed from 'money' to 'wealth': something that the public is eagerly chasing after.

Our society defines 'capitalist' as a person who has attained a tremendous amount of wealth. As a result, many people pay attention to utilize their extra resources and create additional values rather than feeling satisfied with maintaining their current job.

In the 21st century, there are various ways to actualize in accumulating one's wealth. For example, people attain a second or side job or invest their funds to increase their assets values rather than simply saving their paychecks.

The ideology of capitalism focuses its importance on expanding the wealth of the middle class. Traditionally, people gather their wealth mainly through savings of their job. However, in the 21st century, conventional methodology appears to be ineffective. Many financial analysts and experts argue that people need to search for other opportunities to maintain and increase their financial stability.

The phenomenon resembles how the news media regards factuality as its top priority and filters out and dismiss the fake news. People in modern society struggle to enhance their wealth due to the high cost of maintaining their living quality; yet, their salary has barely increased for their savings. As news media develops a new method to determines the factuality of information, people need to develop a new tactic to increase their wealth.

The same notion applies to manage family finances, launch capital on start-ups, and hold fundraising events for minorities. Similar aspects present on wealth distribution. Financial activities like organizing surplus funds, distributing funds of entrepreneurs and corporations need supports from financial institutions to successfully manage their finances or raise funds.

'Crowd Funding' has appeared to intervene in all the problems to increase the liquidity of funds. The suggested resolution functions as a new financial channel to solve matters that existing finances and entrepreneurs couldn't solve, perceived as an "uprising alternative finances."

'Crowd Funding' is the practice of funding a project by raising small amounts of money from a large number of people. It is attractive for not yet renowned start-ups or artists to introduce themselves online and build relationships and promote a sense of assimilation, conformity, and support with the public.

The fundraising method has spawned numerous successful cases, especially attracting its attention in the EU and the United States. In 1997, an England rock band named 'Marillion' successfully raised \$60,000 online for offshore tours in the United States.

An online crowdfunding platform 'Artist Share' first appeared in 2001 and created an online funding platform. The company supported the debut of an unknown singer named Maria Schneider; she later won a Grammy in 2005.

Another auspicious crowdfunding company is 'KIVA': an online crowdfunding platform that offers small loans for minorities. KIVA's scale of loan services reaches .4 million dollars with a 98.9% amortization rate. Followed by the success, a company named 'Prosper' first appeared in 2006 offered small loan services for start-ups to smoothly launch their business.

Similarly, an American company 'Lending Club' provides loan brokerage services between individuals on Facebook; the company provided the amount of 353 billion dollars in loans in 2013, overtook the amount of Prosper, which provided the amount 255 billion dollars in loans.

In 2008, another crowdfunding company named 'Indiegogo' raised funds for movie production, and in 2009 Kickstarter was found, letting the public be aware of crowdfunding as a new source of fundraising. The concept of 'pre-order' for upcoming products has settled as Kickstarter's business model. Kickstarter has left numerous successful business cases, discovering the first pizza museum worldwide, launching a smartwatch ahead of Samsung and Apple and 3D printer.

To be honest, booms of blockchain projects and cryptocurrency from late 2010 largely derives from crowdfunding, including but not limited to its infrastructure and fundraising method. Most crypto fundraising methods, including ICO, IEO, Soft cap, Hard cap, are all based on crowdfunding.

However, the sudden downfall of the crypto market value in 2019 has greatly diminished the potentials of both the blockchain projects and cryptocurrency. To counterattack, all the blockchain projects rearrange their business model to dismiss all frauds and scams. For now, it seems the only possible intervention for blockchain projects to get approval from governmental regulation is crowdfunding.

'I Cloud Funding' ("ICF") has appeared to resolve the same matter. What differentiates is its approach of crowdfunding with a combination of blockchain projects and cryptocurrency.

Instead of demanding the public to 'pre-order' by presenting its future investment value, ICF approaches everything from the public's point of view. It comes up with numerous business strategies to successfully raise its investment profits in a short-term period, one of the significant considerations for potential clients. By launching a business model discovered with long-term, intricate business planning will eventually benefit investors to get investment profits in a short period, remove uncertainties in investment loss, and keep a steady rate of investments.

Finally, ICF suggests another resolution to increase clients' trust in the blockchain project and creates practices to secure its investors. Of course, ICF is carefully designed to provide an opportunity for the public to reserve and accumulate their wealth. To achieve the goal, our project suggests the issuance of crypto "ICF" (I Cloud Funding) and develops the crypto's service platform for investors.

1. ICF PLATFORM

ICF platform will continuously promote and provide supports for potentially successful blockchain projects and cryptos, utility tokens ("UT"), with constant suggestions of new directions to attract investors and funds.

ICF platform primarily focuses its business model on promoting investments, investment amortization, and launch of blockchain projects, which minimize the gaps between the clients' investment and the fundraising services. The platform takes a similar profit distribution model as 'Airdrop'; it provides rewards for the participants in creating an ecosystem of a blockchain project.

2. ICF COIN ECOSYSTEM

ICF ecosystem focuses on attracting more investors of blockchain and crypto projects by utilizing its platform.

When a user adopts ICF platform, it does not only reward his investment but also reward other project investors and its operating institution. In other words, the participants of ICF ecosystem can either be the blockchain project operator or investor, but as soon as they join the ICF platform, they are indirectly become the participants of crowdfunding.

3. UTILIZATION OF ICF COIN

Blockchain Project

When there is a crowdfunding event through ICF platform, the operating institution or operating company can pay gas or fees in ICF coin. Such a method is suggested to minimize the financial pressure deriving from funds collecting

Project Investor

Project investors can pay its platform fee partially in ICF when claiming rewards or profits as investment profits under a specific investment project.

Crowdfunding

Both project investors and operating institutions can utilize ICF coin as a source of crowdfunding source. In general, they can adopt major cryptos, Ethereum(ETH), Bitcoin(BTC), and Tether(USDT), or use ICF coin along with its platform as a source of funds.

Value of ICF Coin

ICF platform can share most of its service fees with project investors, project operators, and coin holders. Also, depending on the investment size and the crypto holding or staking amount, the project operating institutions can conduct Airdrop on ICF coin holders.

By doing so, the platform will create a positive loop of promoting a blockchain/crypto project and re-investments via Airdrop and gradually reduce the uncertainty of both short and long-term investments.

Consequently, purchasing specific crypto of a blockchain project will boost up the fundraising effect and function as a key to reserve the short-term achievements through the ICF platform's option of Airdrop.

4. COIN INFORMATION

NAME I Cloud Funding COIN

SYMBOL ICF

DECIMAL

TOTAL ISSUE 33,300,000,000

TYPE ERC-20

CONTRACT ADDRESS

ISSUE DATE 2021. JAN

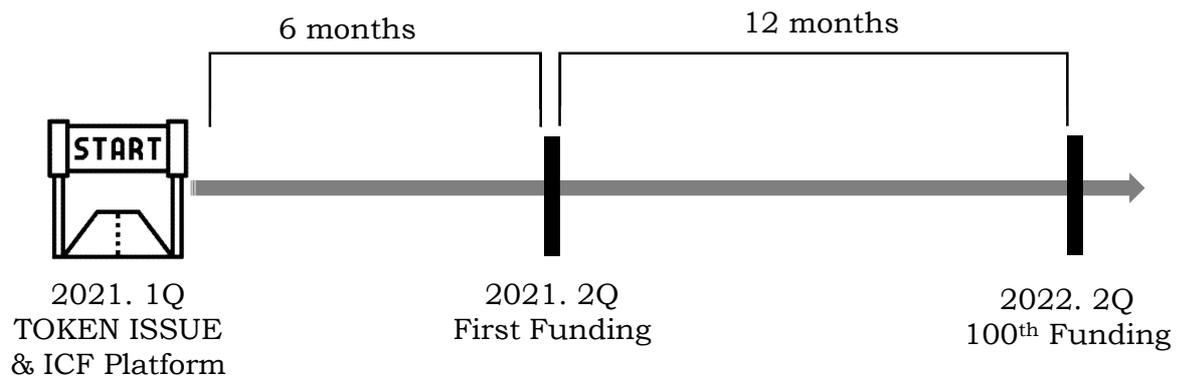

SALE Immediately

1 ICF = Starts at 0.09 USDT

Coin Introduction ICF aims to reflect real-world currency value in the service industry associated with the blockchain. In fact, ecosystem configurations are being realized one by one, and they have a variety of scalability in the blockchain sector. It can continue to receive new forms of compensation, and investors have a block-based ICF technology company through partnerships with the chain to improve marketing activities.

* ICF COINs are not sold on the premise of ICO and IEO.

5. ROADMAP

2021 1Q

Launch I Cloud Funding(ICF) Coin

2021 January

List on TenNTen Exchange and TenNTen World Exchange

2021 1Q

Open I Cloud Funding Platform

2021 2Q

Start the first funding through ICF platform

2021 4Q

Aim to raise 50 cryptocurrency funding projects through ICF platform

2022 1Q

Celebrate 1st anniversary of ICF

2022 2Q

Aim to raise 100 cryptocurrency funding projects through ICF platform

LEGAL NOTICE

Compliance

The Softworld LLC is a registered company in SAINT VINCENT and GRENADINES and abides by the laws of SAINT VINCENT and GRENADINE's financial services organization by adhering to certain laws of the cryptocurrency sector. Our customers should be fully aware of these guidelines and other relevant regulations.

Fiduciary Compliance

We may be executed by a trust service company designated by us in connection with Cryptocurrency.

Policy Compliance

We adhere to the policies of central banks, financial services institutions, and relevant laws in SAINT VINCENT and GRENADINES and related countries.

Law and ownership

The SOFTWORLD LLC(I Cloud Funding service company) is a registered company in SAINT VINCENT and GRENADINES and is responsible for the issuance, distribution, management, processing, and other business activities of ICF COIN tokens. SOFTWORLD LLC is a registered company in SAINT VINCENT and GRENADINES and has exclusive ownership rights and rights for patent technology and registration, advertisement, and operation technology, and registration for ICF COIN use. It is used by a third party and distributed to others and other related rights.

Jurisdiction risk

SAINT VINCENT and GRENADINES is allowed to trade in encrypted currency, and we will strive to expand the use of ICF COIN cipher money and settle the cryptocurrency industry.

Investment risks and guarantees

The information provided in this proposal (or white paper, hereinafter referred to as the "White Paper") is provided solely for the purpose of assessing the value of the ICF COIN Cryptography and its associated value, anyone wishing to purchase an ICF COIN coded currency should not rely solely on the information in this white paper.

We strongly encourage buyers to conduct their own investigations prior to investing. No one is authorized to provide or represent information about the projects and tokens specified herein, and we do not trust or make any representations about such information or its representations if any.

This white paper is for private information and in no case may be interpreted or construed as a 'public offering of securities' under this document. ICF COIN tokens are provided under the exemption from registration and disclosure requirements as set forth in applicable law. This white paper does not constitute an offer to sell or purchase securities.

Anti Money Laundering Act (AML)

Buyers of ICF COIN must agree to not engage in any form of money laundering, illegal currency trading, or other limited activity through the ICF COIN and other related derivatives. Each purchaser must be aware that ICF COINs and other related derivatives cannot be sold, exchanged, or disposed of directly or indirectly for the purpose of money laundering.

Anti-Terror Funding Convention (CFT)

Buyers of ICF COIN must agree not to participate in financing, exchanges, and support activities for purposes of terrorist financing through ICF COIN and other related derivatives. Each buyer must be aware that ICF COIN and other related derivatives cannot be sold, exchanged, or disposed of directly or indirectly for the purpose of financing terrorism. You should be aware that you cannot sell, exchange, or dispose of derivative products directly or indirectly for the purpose of terrorist financing.

Buyer Restrictions

Due to legal issues, this ICO and White Paper are only available to citizens of countries other than Mainland China, the United States, Malaysia, and other areas prohibiting ICO.

Important note

Due to frequent changes to related policies, laws, and regulations, technology, economics, and other factors, the information provided in this white paper may not be accurate, may not be reliable or final, and may change several times. This white paper is for reference purposes only.

We are not responsible for the accuracy and legitimacy of the information provided. Anyone wishing to make a purchase should not rely solely on the information in this white paper. We encourage buyers to conduct their own investigations prior to investing.

Essentially, this white paper is a business proposal or business promotional document, and in no case is it legally binding. The information in this white paper is for your reference only, and the token purchaser should take additional caution.

Language

This document supports various languages. In the event of a dispute, we will resolve the case based on the English version. For a more accurate interpretation of this document, please refer to the English version.

Security

This white paper is confidential and has been created solely for the purpose of being communicated and reviewed by future buyer of the token. Without our prior written consent, it is strictly forbidden to transmit this White Paper to anyone other than the intended recipient, to seek advice from persons not authorized in connection with this White Paper, and to disclose, copy or cite the contents of this White Paper .

A copy of this white paper is personally attributable solely to the recipient of the document and does not induce other persons or the general public to purchase securities or otherwise acquire securities.

Speculative project

The ICF COIN tokens and related proposals in this paper are very speculative due to the nature of the business and relatively early development stages. Buyers must be able to understand the underlying risks. Purchasing a token is only suitable for buyers who are able to take the risks inherent in the project business.

There are many other risk factors to consider for those who want to buy ICF COIN tokens. Buyers should consult their advisors or assistants to discuss income tax, legal and other matters.
